ABOUT US:

Student Educational Welfare Association is an NGO (non-governmental organisation) started in 2018 and registered in late 2021 under Section 8 of the Companies Act, 2013. This NGO was started by the students of a rural area, Madanpur, who were enrolled in different courses at AMU. This NGO basically was started to redress the problem being faced by the weaker section of Madanpur related modern education, but soon our services extended to all other rural areas also. As an NGO, we have been providing our services for the past 5 years in the field of education among the different sections of society, with a special focus on the education of girl child. As we talk about providing modern education, we would like to mention our inspiration, Sir Syed Ahmad Khan, who fought a long battle to provide modern education to the weaker section of society.

"Sir Syed was the Prophet of Education."

-Mahatma Gandhi

"The Hindus and the Muslims are the two eyes of the beautiful bride that is India."

-Sir Syed Ahmad Khan

After analysing all the possible problems faced by the weaker sections in providing quality education to their new generations, we have launched a series of programmes like talent hunt exams based on OMR, an educational awareness programme, and counselling sessions for academic careers. In 2021, we started a free online coaching programme (Sir Syed Coaching & Guidance Centre) for aspirants who want to take admission in central universities in India. In the first batch, about 60 students have cracked the entrance exams of many central universities like AMU, BHU, Jamia, and many more. We have a team of well versed persons inter alia like public speaking, career counselling and many more who have helped the needy persons to acquire the right knowledge and walk through the correct door in order to achieve what is best for them. Our work has made a positive impact on the targeted sections, and seeing the progress, we are willing and will continue working in a more disciplined manner to make this society a better place for the social minorities.

OUR VISION & MISSION

Our organization's vision is centered on the commitment to offering high-quality education to marginalized communities, aiming to bridge the educational gap prevalent in society. We firmly believe that education serves as a powerful tool for personal and collective growth. By empowering individuals through knowledge and learning opportunities, we strive to create a society where everyone can contribute to its progress.

To achieve our vision, we have a clear mission: to extend educational support to remote areas in India. We understand that access to education in these regions may be limited, and we aim to address this disparity by bringing educational resources and opportunities to those who need them the most. By focusing on these underserved communities, including minority groups, we aspire to enable them to pursue their aspirations and fulfill their goals through education.

By promoting education as a means of empowerment, we aim to uplift individuals and communities, fostering a sense of inclusivity and equal opportunities. We firmly believe that education is an invaluable investment, not only for personal growth but also for the betterment of society as a whole. Through our vision and mission, we are dedicated to making a positive impact and creating a better future for all.

EXAM COMPETITION SERIES

We, Student Educational Welfare Association (SEWA) have been organizing competitive exams for rural students based on the patterns of central universities. The aim of these exams is to create awareness among rural students about the changing trends in education and provide them with a competitive environment to prepare for their future. The competitive exams organized by SEWA provide an opportunity for rural students to test their knowledge and skills against their peers. The exams are based on the patterns of central universities, which ensures that the students are well-prepared for the changing trends in education. The exams have received a positive response from the students and their families, who see this as an opportunity to improve their chances of success in the future. The competitive environment created by these exams motivates students to work hard and strive for excellence. We plan to continue organizing such exams in the future and expand our reach to more rural areas. We believe that by providing students with access to quality education and creating a competitive environment, We can help bridge the gap between urban and rural education.

MADANPUR TALENT HUNT COMPETITION, 2019

Madanpur Talent Hunt Exam is an OMR based talent hunt exam with a motive of introducing the modern methods used in competitive exams in order to make the students of rural India completely aware of the revolutions in the field of education. We have been conducting this exam since 2018 which has helped the students of rural India not only to know the competitive environment but has also encouraged them to take more and more part in the modern education. This exam is conducted on a nominal fees of Rs 100 only which gives every single student opportunity to take part, as a result the number of students taking part has been significantly increased from 200 in year 2018 to 1000 in 2023. Today, we can proudly say that our initiative has not only opened a door for the minorities but has created a pathway to their sparkling dreams which surely will lead them to a world free of ignorance. And we hope that these numbers will keep rising and we intend to continue the process for more betterment of the students in rural India.

SUPER 20 (2020, 2022 & 2023)

Series of Super 20 named exam is the successor of Madanpur Talent Hunt Exam- 2019. In this series of Super 20 exam, we focus on the top 20 scorers and offer them free counselling sessions with our faculty members which helps them clarify their objective of choosing a field for their academic career. This exam had played a vital role for us in choosing talented but financially weak students so we can help them out in every possible manner. The outcomes have been better and better by every passing year, for instance 500 students appeared in the first season & in the third season the number crossed the milestone of 1000 students. This series has helped us in creating a competitive environment for the students in rural centres and we intend to keep working in a more enthusiastic manner for the betterment of the students of backward areas.

EDUCATION AWARENESS PROGRAM

Moving forward we found that even after our progressive work some sections were still not coming forward to change their condition and step into a literate and more civilized society so, we started analysing flaws which have had become a hurdle in doing so. So, after observing the problem being faced by the students and their parents in continuing the studies, we decided to launch an awareness program to make the people aware of the Importance of Education and the problem being faced by them along with the society due to Lack of Education. In the series of Educational Awareness Program, the first program was launched in 2018 themed as The Importance of Education.

IMPORTANCE OF EDUCATION, 2019

In 2019, we organized a seminar with the aim of raising awareness about the importance of education, specifically targeting the lower class of society. We wanted to shed light on the struggles and hardships they face due to the lack of education. The seminar served as the initial stage of our program, and we were thrilled by its success. It had a profound impact, as even parents who were engaged in low-paying jobs or activities recognized the value of education and stepped forward to prioritize their children's education. Witnessing the positive response, our NGO made a commitment to assist these families in every possible way throughout their educational journey. We pledged our support, ensuring that they would receive the necessary resources, guidance, and assistance to help their children excel academically. By addressing the issue of education inequality and empowering these families, we aimed to uplift the entire community and provide them with a brighter future. This program highlighted the transformative power of education, as it not only awakened a desire for learning in the parents but also offered hope for a better life for their children. It demonstrated that education is a vital tool for breaking the cycle of poverty and creating opportunities for a brighter and more prosperous future.

SIR SYED MEMORIAL PROGRAM, 2021

We have seen many warriors who have fought for our freedom from external forces, and some have taught us to fight from our inner evils by giving us quality education. And the most significant example of the second type is Sir Syed Ahmed Khan, so we decided to organise a programme in his honour. In the year 2021, we organised the Sir Syed Memorial Program with the motive of bringing people under a single roof of collective thinking for the development of society through education as a means, and in this programme, we felicitated the well-qualified and educated personalities who have been contributing in the field of education. This programme was aimed at encouraging the people to take more and more part in the educational welfare societies.

EDUCATIONAL AWARENESS PROGRAM -2022

In 2022, we organized an educational awareness program with a special focus on promoting the education of girls. Even though we are in the 21st century, many girls still face challenges and are not given equal opportunities for education. We strongly believed in working towards improving their education and their position in society. As a result of our efforts, we saw a significant increase in the number of girl students enrolling in our institution for higher education. The positive outcomes of our program have motivated us to continue our work with even more enthusiasm. We are determined to support girls' education in every possible way.

If we are going to see real development in the world then our best investment is **WOMEN!**

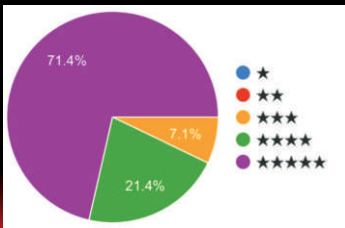

- Desmond Tutu

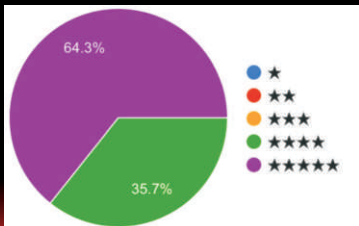

SIR SYED COACHING AND GUIDANCE CENTRE

This program was started in late 2020. Being a part of rural India one can easily figure out which are the most common problems faced by the people and that is Money Problem. In order to redress the problem in a least way we started a free coaching and guidance centre to help the financially backward student achieve their goal and started giving them coaching and guidance related the centre universities like AMU, JMI & BHU. Firstly we started this coaching in Madanpur (a village in the district of Deoria, U.P.) in a rental unfurnished classroom with about 15-20 students. But with in a month, we decided to convert this offline coaching into online so that every aspirant from every place can join our coaching. As a result, we now have more than hundreds of students enrolled in many prestigious institutions and trying their best to achieve their goals make this society a better place.

WATER CAMP

We, Student Educational Welfare Association (SEWA) recently organized a free water distribution camp to provide water and snacks to students who came to appear in the entrance examinations of various courses at Aligarh Muslim University . The event was a huge success, with many students benefiting from the initiative.

We are committed to provide support and assistance to students from economically weaker sections of society. The free water distribution camp is just one of the many initiatives that we have taken to fulfill our commitment to provide students with basic necessities.

Access to clean drinking water is a fundamental right that should be accessible to all. By organizing this free water distribution camp, We, SEWA have taken a small step towards fulfilling this right for students in need.

SEWA plans to continue organizing such events in the future to provide support to students in need. We urge everyone to come forward and support our cause, so we can continue to make a positive impact in the lives of students.

OUR TEAM

Our team at SEWA is comprised of passionate individuals who are driven by a shared vision of improving educational opportunities for students. Our team brings a diverse range of skills and experiences to the table, from teaching to fundraising and community outreach. This diversity allows us to approach challenges creatively and develop effective solutions to address the needs

of the weaker section of the society. What sets our team of SEWA apart is their tireless dedication to their mission. We organize a wide range of programs, including educational workshops, mentorship programs, and fundraisers to support students and enhance their academic experience. Their efforts have helped countless students achieve their academic and personal goals.

Support us

We Student Educational Welfare Association a non-governmental organization registered under Section 8 of the Companies Act, 2013 and are committed to enhance the educational experiences of underprivileged students. We firmly believe that education is a fundamental right that should be accessible to all, regardless of their socio-economic background. Through our tireless efforts, we provide educational opportunities and support to disadvantaged students to enable them to achieve their full potential. As a non-profit organization, we rely on the generosity and support of our donors and partners to sustain our operations and make a difference in the lives of students. Your donations enable us to provide scholarships, educational resources, and other forms of assistance to students who may not have access to them otherwise. With your support, we can continue to work towards our goal of ensuring that every student has access to quality education and equal opportunities. We invite you to join us in our mission to support the education of underprivileged students. Your contribution, no matter how big or small, can make a meaningful impact in the life of a student, providing them with the chance to succeed and reach their full potential.
